

# Special Projects Division

Providing specialised and expert Mechanical and Electrical packages for valued clients. Showing pride in project delivery.

**The Kershaw Mechanical Services Special Projects division has been developed to work directly for end-clients and is headed up by an expert management team.**

Utilising the experience, supply-chain management and technical skills developed working on multi-million-pound projects, the Special Projects division caters for the more unique, complex and sometimes challenging projects required by our valued clients.

We work for a number of sectors and are fully conversant with a number of specialist schemes, with particular extensive laboratory management experience including Wet and CL3 environments, including full M&E service packages.

We have an in-house Cad and BIM department and we are able to deliver fully coordinated 3D and BIM level 2 projects. Our direct labour force, full off-site ventilation and ductwork manufacture and prefabrication facilities provide us with unrivalled facilities and abilities.

- Providing expertise for projects to the value of £400,000.
- Highly skilled and experienced team.
- Backed-up by Major Contracts division.
- In-house ductwork manufacturer and pre-fabrication facilities.
- In-house Cad and BIM department.
- Extensive portfolio of clients in the following sectors: Laboratory research, education, retail, entertainment, TV production, motor industry, office buildings.
