

Kershaw

Mechanical Services Limited

Delivering the complete M&E services package from design to commissioning

Full building service contract management

If you are looking for the whole Mechanical and Electrical services package, with full co-ordination of every aspect of the building service contract, then Kershaw Mechanical Services has the solution you need. We specialise in the design, manufacture, supply, installation, testing and commissioning of industrial and commercial building services backed up by first rate project management.

Our clients range from blue chip companies, household name retailers and international construction contractors to the University of Cambridge, national property developers and major NHS trusts. Our sector experience includes education, sports and leisure, MOD, museums, healthcare, commercial offices, industrial and retail with a single project value of up to £10m.

We have an acknowledged reputation in the industry for delivering full turnkey contracts, to specified deadlines, however tight, without sacrificing quality.

In-house design

Kershaw Mechanical Services has its own design department, which works in partnership with external design consultants, offering the full design package. Kershaw's in-house auto-CAD drawing facilities include 3D modelling and walk through. We use the latest CAD technology, compliant with CDM regulations, and many of our designers have achieved chartered status. The team is particularly experienced in energy-saving design.

In-house ductwork manufacture

Operating our own ductwork and pre-fabrication facilities means we can give clients greater certainty on project delivery times than the industry norm. Ductwork is only manufactured for Kershaw's own projects, enabling us to maintain tight controls on cost, programming, manufacture, delivery and installation. Additional benefits include fast response time to design changes, and offsite prefabrication of pipework, bracketry, support steelwork and other bespoke items.

Commitment to quality

- As a company, Kershaw Mechanical Services is committed to continuous improvement in the delivery of its clients' needs, regularly reviewing and developing its products, services and installation techniques.
- We apply stringent quality control procedures at every stage of construction: accreditations include ISO9001:2008 (Quality Management), ISO14001:2004 (Environmental Management) and BS OHSAS 18001:2007 (Health and Safety Management).
- We run a variety of apprenticeship schemes which ensures our directly employed workforce is highly trained and covers the wide range of skills demanded by the construction industry.
